

The provision of bike stores for new housing forms part of many developments. There are many products available that provide solutions for the secure storage of bikes on individual houses. They are often used at the front or rear of properties and are available in a number of materials and styles.

Sitemaster promote only the best products and have put together this brochure to demonstrate these in a range of materials and finishes. This includes our own brand Clad Secure, that provides aesthetically attractive products with utmost security.

Details of our most popular products are contained within this brochure and if you wish to discuss these further with us or would like prices please contact us
